MLS[®] System

The MLS[®] system is the most extensive and current computerized database of real estate transactions. Only real estate brokers who are members of a real estate board have access to it. The MLS[®] system is a collaboration system that follows very specific rules that all real estate brokers adhere to.

Residentiel

Includes the following property categories: single-family homes, condominiums, revenue properties with 2 to 5 dwellings, and hobby farms.

New Listings

The number of new brokerage contracts with a signature date that falls within the targeted period.

Active Listings

The total number of listings that have an "active" status on the last day of the month. Quarterly and annual data correspond to the average monthly data for the targeted period.

Number of Sales

Total number of sales during the targeted period. The sale date is the date on which the promise to purchase is accepted, which takes effect once all conditions are met.

Volume of Sales

Total value of sales, in dollars (\$), with a date corresponding to the targeted period.

Average Sale Price

Average number of days between the sale date and the date the brokerage contract is signed, for a given listing.

Average Sale Price

Average value of sales, in dollars (\$), for the targeted period. To obtain a more significant average sale price, some transactions may have been excluded from the calculation.

Median Sale Price

Median value of sales, in dollars (\$), for the targeted period. The median price is that which divides all transactions into two equal parts: 50% of transactions were at a lower price than the median price and the other 50% were at a higher price. In order to obtain a more significant median price, some transactions may have been excluded from the calculation.

Caution

The average and median property prices indicated in this brochure are based on transactions concluded via the MLS[®] system during the targeted period. They do not necessarily reflect the average or median value of all properties in a sector. Similarly, the evolution of average prices or median prices between two periods does not necessarily reflect the evolution of the value of all properties in a sector. As a result, caution is required when using these statistics, particularly when the number of transactions is low.

About Centris[®]

Centris[®] is a leading-edge technology company that provides Québec's 12 real estate boards and their 14,000 brokers with the latest industry-approved technological resources. Our mission is to provide and manage real estate information and technology solutions so that members can successfully meet their business objectives and maintain their predominance in the real estate industry.

About the QFREB

The Québec Federation of Real Estate Boards (QFREB) is a non-profit organization that oversees the twelve provincial real estate boards. Its mission is to promote and protect the interests of Québec's real estate industry so that the boards and their members can successfully meet their business objectives.
